Ace Glass

BA-EB + ■ △ ●

DESCRIPTION

The Ace_Glass series is born from the combination of mechanical precision and high-quality technical materials. The turned aluminum body is enhanced by a cylindrical Pyrex glass element, which not only highlights the fixture's shape but also enhances its light emission. The essential geometry, combined with the transparency and purity of the glass, gives the product a sophisticated and contemporary formal language. Ace_Glass stands out as a luminous design object, capable of blending function, aesthetics, and innovation within residential or contract spaces. Ace_Glass is not just a fixture: it is a style statement, a light that furnishes with character and restraint.
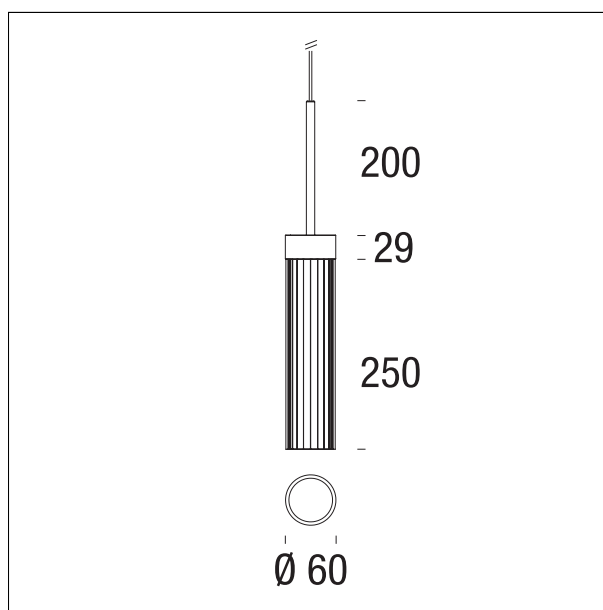

PRODUCTS CHARACTERISTICS

installation type	**sospensione**
material	**alluminio**
Finish	**anodizzato**
Colour	**Nero**
Power	**9,5 W**
Lumen output – Full emission	**max 700 lm**
Efficacy	**max 74 lm/W**

* Code to complete

Colour ■		CCT △		Cable length ●	
Nero	B	2700 K	1	3 m	2
