

Jasper

GDN05140 - Small - h 470 mm / 2,2 W / 3000 K

DESCRIPTION

Table lamp for indoor and outdoor. Of great scenic effect, it fits perfectly in domestic environments and in the catering industry. It comes in two sizes, small and medium. The structure is in die-cast painted aluminium and uses a polycarbonate led diffuser; thanks to the particular shape of the reflector it offers a valid visual comfort with soft and controlled emission. The power button, positioned on the lamp structure, has a "touch dimmer" function and allows the adjustment of the light intensity. The device guarantees long periods of ignition even when used at the maximum light level. Supplied with a contact charging base (220V AC) with USB cable. The luminaire can also be installed on a wall or pendant using specific accessories.

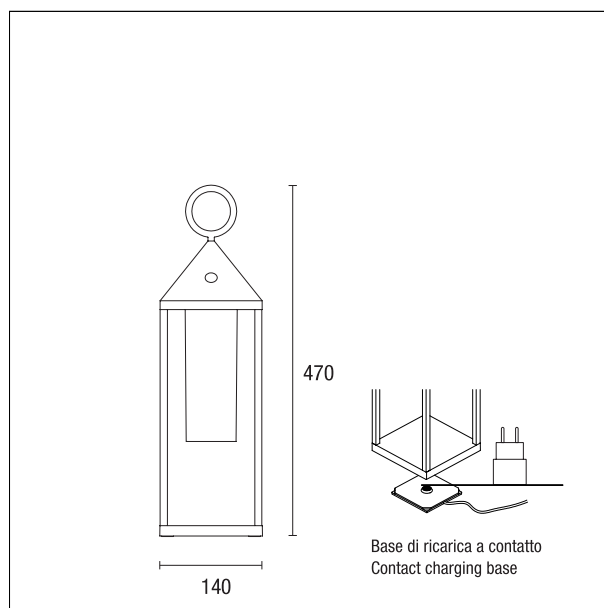

Switch

On÷Off

PRODUCTS CHARACTERISTICS

installation type	da tavolo
material	alluminio
Finish	verniciato opaco
Color	Bianco
Power	2,2 W
Lumen output - Full emission	160 lm
net weight	1,88 kg

ELECTRICAL CHARACTERISTICS

feeding	3,7 V DC
driver	On÷Off
Insulation class	Classe III

MECHANICAL CHARACTERISTICS

product IP rate	IP54
