DESCRIPTION

The Shop series consisting of a range of gimble projectors specifically designed for shop lighting and mounted on metallic modular plates. The plates, squared or rectangular, can be equipped with one, two or three projectors that can be oriented independently among them. This solution allows to group in a single light and in a single cut of the false ceiling more independent light sources saving on installation costs without renouncing the versatility of the system. The chromatic qualities of the LEDs used are CRI > 90 and SDCM < 3 and the fixing clips allow installation without tools.
