

### CoB Line

STP30152 - PCB size 8 mm. - 10 W/m - / 10 W/m / 3000 K / CRI > 90

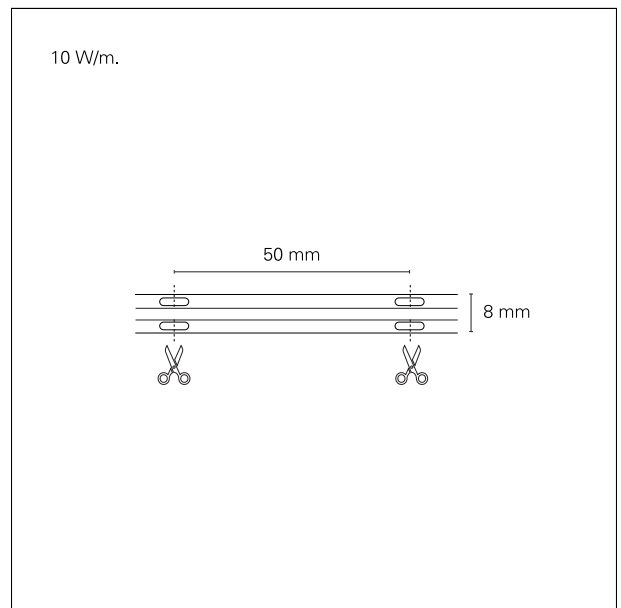

#### DESCRIPTION

The CoB Line strip definitely solve the light dotting trouble which is perceivable in many traditional ministrips due to the proximity between the screen and the strip itself. The effect given by the CoB Lines is a continuous line of light, without any interruption. The 4 mm models are perfectly suitable with the aluminum profiles of the Micro series; this combination allows to create very thin lines of light, performing and without interruptions of light. The use is also particularly simplified for custom cutting. The indications on the PCB make easier the installation operations.
